

Stijn Stroeckx

Software Engineer - Gameplay Engineer

I'm a Game Engineer, passionate about gameplay with experience in UI and tool development. In my free time I often work on side projects, usually related to games, IT or web.

EDUCATION

Game Development

Digital Arts and Entertainment - Howest College

09/2015 - 06/2020

WORK EXPERIENCE

Gameplay / UI Engineer

Salty Lemon Entertainment

02/2020 - 2022

Antwerpen, BE

Salty Lemon is a game/app development studio from Belgium, focusing on fitness app EXR

EXR

- EXR is a 3D game to motivate exercise by making rowing fun through gamification.
- I worked on EXR as a Gameplay Engineer, but with a strong focus on UI development.
- Some of the main features I worked on are: Event system, Training system, In-game HUD, Report UI, Main Menu, Customization/shop, Notifications, Achievements/Challenges, and internal tools for these systems.

Contact : Keke Kokelenberg (Co-Founder) - 0497 71 14 25

Software Engineer

Connecto bvba

09/2017 - 08/2018

Kiosk and Digital signage, E-commerce solutions.

Tasks

- Software development and maintenance
- Project management
- Hardware installation and support

Contact : Gert De Meutter (CEO) - 0495 28 21 01

PROJECTS

Game related projects

- EXR - A 3D game to motivate exercise by making rowing fun.
- Obelisk, Hatchoo, dodge'em, mari0, and more game projects
- [Legendary Stock Tracker](#) - a WoW addon for inventory management and restocking
- More details about these projects can be found on at www.stroeckx.com/portfolio

Reddit flairbot (07/2015 - 2022)

- Gotrade pass started as a flairbot made for /r/globaloffensivetrade. It uses both reddit API and steam API to link accounts to each other. The system quickly expanded to add 5 other subreddits and got a better management system to moderate one user across all platforms.
- So far, there have been well over 200.000 registrations through this system.

The collective (09/2019 - 01/2020)

- The collective is an interdisciplinary project, where students from Digital Development and Design, Industrial Product Design and Digital Arts and Entertainment work together on a project for Volkswagen about autonomous driving.
